

Fire alarm central Salwico Workboat CI

Part no. 5102013-01A

General description

Salwico Workboat CI is a conventional fire detection system with 8 fire detector sections SOLAS compliant. Tested and certified by all major classification societies, this system provides an optimal fire detection solution for smaller vessels.

The system is managed and supervised through Control Panel M 4.3. The Control Panel M 4.3 is mounted on the front of the fire alarm cabinet.

The central is delivered complete with:

- 1 x Control panel M 4.3, Internal
- 2 x Power supply AC/DC 2.5A (A 24 VDC kit can be ordered separately).
- 1 x I/O 70, for 8 conventional sections
- 8 pre-configured powered outputs 24 VDC. (Max. consumption 1.8 A)
- Batteries 24V, 1,3Ah
- Optional serial interface (NMEA)

The cabinet is for wall mounting.

One multi flange for cable inlet is included in the delivery.

Data

Nominal voltage	100-240VAC
Power consumption	~10W in normal condition
Heat emission	~25 Kcal/h
Ingress Protection	IP32
Cable terminals	2.5mm ²
Temperature range	-5°C to +55°C
Material, cabinet	Steel
Colour, cabinet	RAL7035
Weight	~10,5 kg
